This document has been produced with the financial assistance of CTA. The views expressed herein are those of FANRPAN and can therefore in no way be taken to reflect the official opinion of CTA

This Directory was compiled by Development Data and Designed by Digital Concepts

Whilst every care has been taken in the preparation of this Directory, the publishers do not hold themselves responsible for any errors or inaccuracies which may inadvertently occur.

Food, Agriculture and Natural Resources Policy Analysis Network of Southern Africa (FANRPAN)

FANRPAN's mission is to co-ordinate, influence and facilitate policy research, analysis and dialogue at the national, regional and global levels in order to develop the Food, Agriculture and Natural Resources sector through networking, capacity building and generation of information for the benefit of all stakeholders in the SADC region.

The FANRPAN objectives are to:

- * Promote appropriate agricultural policy in order to reduce poverty, increase food security and enhance sustainable agricultural development in the SADC region.
- * Improve policy analysis, research and formulation of priority SADC agricultural research themes.
- * Develop human and institutional capacity for co-ordinated dialogue among stakeholders
- * Improve policy decision-making through the generation of, exchange and use of policy related information.

The FANRPAN stakeholder is intended to bring together the network's stakeholders. The list is drawn from all engagements with the network through meetings, workshops and other modes of communication. Users are encouraged to use this directory to assist in communicating among themselves in-country, regionally and globally.

Who are the stakeholders of the FANRPAN network? The strength of the network is in country platforms, the NODES whose membership comprise government; farmer organisations; research institutions; academic institutions of higher learning; policy makers and the private sector. FANRPAN works through its nodes in 12 SADC countries; facilitating networking on food, agriculture and natural resources issues. The nodes are coordinated by a regional secretariat, based in South Africa. FANRPAN thrives to ensure that stakeholders continue to meet, engage in dialogue, inform the research agenda and contribute to the process of establishing a conducive policy environment for the food, agriculture and natural resources sector.

About the Directory. This directory was developed in a three stage process that involved collecting information on FANRPAN's stakeholders, designing a web-based data storage system, and compiling a print version. This version therefore complements the web-based search engine (www.fanrpan.org/databases/) that has additional information on contacts. It paves the way to ensuring that professionals that have been in touch through the network can network themselves.

How does one use the directory? To enhance usability, this directory has an index showing alphabetical listing of stakeholders in each SADC country by sector. The table of contents is also categorised on a sector basis. Additional information on the contacts is available on the FANRPAN website.

FANRPAN appreciates that stakeholders often move and change contact details, and have therefore developed the web version of the directory as an interactive database where stakeholders have the opportunity to update their own details. This is useful in case we have not captured your details correctly. FANRPAN will also launch a chat and e-forum to encourage debate on food agriculture and natural resources.

More information on FANRPAN is available on www.fanrpan.org. We encourage you to register on our e-contacts database.

Thank you

Lindiwe Sibanda
Chief Executive Officer - Head of Mission
