

#INVESTINCSA PROJECT PITCH

TRANSFORMING CROP & LIVESTOCK PRODUCTION SYSTEMS FOR CLIMATE RESILIENCE IN SOUTHERN AFRICA

GOAL

Expanded uptake of climate-smart agriculture and pastoral production systems that are more resilient to climate shocks and soil fertility breakdown; leading to higher yields and incomes, and healthier populations, ecosystems and economies while creating an enabling policy environment to combat climate change.

FUNDING REQUESTED: USD 40 MILLION

TIME FRAME: 5 YEAR

METHODOLOGICAL APPROACH - THREE (3) WORK PACKAGES:

Work Package 1

Scaling out CSA practices to farmers and pastoralists/herders.

Led by CIMMYT, RSDA, PPF & CI

Work Package 2

Local, national and regional knowledge generation and dissemination and capacity building.

Led by CCARDESA

Work Package 3

Strengthening the enabling environment: aligning CSA related policies, strategies and targets.

Led by FANRPAN

EXPECTED OUTCOMES

- The area under climate-smart agriculture (CSA) and sustainable pastoralist practices in southern Africa is expanded
- The resilience of smallholder farmers and pastoralists is increased, expressed by higher productivity and profitability.
- Farm families acquire increased knowledge and capacity about CSA principles and apply these principles on their land .
- Increased carbon sequestration and reduced soil erosion
- The private sector promotes CSA technologies.
- All relevant stakeholders access, develop and disseminate knowledge products on sustainable and CSA through existing ICKM systems.
- Agriculture policy makers utilize relevant data from the CSA systems to raise ambition.
- Policy priorities to support CSA aligned with the goals and objectives of regional and international policy frameworks.

REGIONAL SCOPE

SADC and Specially in

Botswana,
Lesotho,
Malawi,
Mozambique,
Zambia
Zimbabwe
